
Release Note 3.2.60 for TD-SCDMA TX Measurement

New Features:

- none

Bug Fixes:

- Fixed some TPC measurement related problems
- Remote command `FETCH:TDSCdma:MEAS<i>:MEvaluation:SPECTrum:AVERage?` does not return 'INV' anymore.

Known Issues:

- There is some sync problem when Eoffset =0 for Continuous signal
- When configure big trigger offset, sometimes active slot detect is not correct
