ROHDE&SCHWARZ

Release Note 3.2.60 for TD-SCDMA Signaling

New Features:

- CMW-KS750: Dual E2E support with DAU
- CMW-KS750: Redirection to external instrument

Bug Fixes:

- changing TPC step size does not destabilize signaling application
-

Known Issues:

- Uplink Close loop power control is only supported for 12.2k and 64k.
- BER measurement is not supported for DL 384k.
- Call paging timeout occasionally
- BLER_AM_mode1: Sometimes no looping back data with symmetric data rate 144k
- "Signaling Unit Failure" happens sporadically
- HO fails sporadically
